

2003

IMMEDIATE TASKS FOR RUFUS

1. Provide Headquarters with a detailed report on the development of PW teams. How many men? Where are they located? How mobile are they? What materials mentioned in the 30 Day Plan have already been printed? What other materials have been printed? Send 4 copies of everything to Headquarters.
2. Prepare a thoro study of PW facilities in the Capital City. If available facilities are not sufficient --- concrete feasible actions to be taken by RUFUS to remedy the situation are also to be reported to Headquarters.
3. Prepare a list of key army officers (loyal to the present government) as soon as possible for dispatch to Hq. Such a list should include information concerning: weaknesses, frictions between officers, any indications of abnormalities and their addresses.
4. Initiate the infiltration of men, capable of spreading rumors, into all key military installations with special emphasis on the army garrison in the Capital City. In addition to the spreading of planned operational rumors, the rumor net should also be alert for spontaneous complaints and rumors which could abet the RUFUS operation. All rumors should, with varying twists, state, "The Government and its Communist friends are responsible for all complaints - Only solution: Get rid of the Government and the Communists." Headquarters requests a report on the development of a rumor net - how many men and where as soon as possible. On receipt of this study, Headquarters will make operational suggestions.
5. If the Communists were ordered to overthrow the local government, who do you think would be named as chief of the Communist Party? The puppet government? The army?
6. Draft an ostensible Communist plan for the overthrowal of the local government to be scheduled for mid-1954 including names, locations of arms, places and as much other detail as possible. It is imperative that such a plan appear to be as legitimate as possible. Draft a similar plan for the overthrowal of neighboring nations to the south.
7. Prepare a list of themes which might be used to cause discontent among: Farmers, Students, Laborers and other special groups in the Capital City and other key cities and send them to Headquarters.
